

Disappearing Links in Edublogs

Several teachers have been asking us, “Where have my links gone? They were there before, but now they’re gone!” Don’t worry, it’s an easy fix. Edublogs has updated your blog to a new version with many new features. However, for your links to appear again, you need to put them in **categories**. Here’s how:

1. Go to your Dashboard and click on **Blogroll**.
2. Make sure your in **Blogroll Management**.
3. Click on the **Edit** link under **Actions**
4. In the Edit Link window on the right side under **Categories**, type in a new category name, click the **Add** button, and then check the box next to your new category.
5. Don't forget to hit the **Save Changes** Button.
6. Repeat for next link.
7. View your site and the links will be listed on the side bar. That's it!
